# Order Picking

## Web & Mobile App

Eliminate the most common reasons for complaints: With the **Order Picking** app, you ensure the quality of your picked deliveries while simultaneously accelerating the picking process.

## Your Benefits

- **Error Avoidance:** Our app provides reliable support to your warehouse staff, minimizing errors.
- **Time Savings:** The app guides your employees directly to the right storage location, saving valuable time and optimizing the picking process.
- **First In, First Out:** Thanks to intelligent batch management, you ensure that older goods are picked first.
- **Real-time Retrieval:** Picked goods are immediately re-booked, allowing you to always keep track.
- **Seamless Integration:** Utilize the benefits of the integrated Bitergo Warehouse Management Solution and access other apps such as Corrections, Packaging and Outgoing Goods.

# Order Picking Web & Mobile App

## Functions and Features

**Discover how Order Picking revolutionizes your warehouse processes:**

### Overview of Deliveries:

Get a clear overview of all necessary picking orders when starting the app.

### Manual Order Creation:

Easily create new deliveries and add all relevant information.

### Precise Management of Delivery Positions:

Select items, define quantities, and specify batches, serial numbers and expiration dates.

### On-site Picking:

Your warehouse staff receives all relevant information about the orders directly on their mobile device.

The screenshot displays the Warehouse Star Order Picking interface. The main window is titled "Picklist/Shipments/Shipments lines edit" and features a navigation sidebar on the left with options for Shipments, Picklist, and Transports. The central area is divided into an "Item master" table and a "Shipments lines" table. The "Item master" table lists various items with columns for Number, Quantity type, and Desc. The "Shipments lines" table shows details for a specific shipment, including item number, note, lot, expiration date, and quantity. A "Load" button is visible below the quantity field. On the right side, there are several informational panels: "Text/label" (Order: LIEFER-00000007), "Status/time" (Status: Pending), "Party/measure" (Freight carrier, Consignor, Gross weight, Net weight, Volume), "Identifiers", "User area", and "Consignee".

Overlaid on the main interface are three floating windows:

- Shipment**: A form for creating or editing a shipment. Fields include Order\* (LIEFER-00000007), Type\* (Shipment), Tenant, Description (Empty), Note (Empty), and Classification(s). Buttons for "Ok" and "Cancel" are at the bottom.
- Kommi-Liste**: A window for creating a picking list. Fields include Bezeichnung (Neue Kommi-Liste), Bemerkung (Leer), and Ziel\* (PA-01). A "Reservierung\*" dropdown menu is open, showing options like "FIFO", "FIFO mit Entpacken", "FIFO + KP", "FEFO Lagerverpackung", "Kommissionierbereich", "FEFO + KP", and "FEFO".
- Picking-Strategy-Settings**: A window for configuring picking strategies. Fields include Name\*, Tenant, Shipment classification, and Reservation\*. A dropdown menu for "Reservation\*" is open, showing options like "FIFO", "FIFO with unpack", "FIFO + CP", "FEFO storage packaging", "Pick Area only", "FEFO + CP", "FEFO", and "Pick Area first". Buttons for "Ok" and "Cancel" are at the bottom.
